SUMMARY

I am a motivated and adaptable Business and Information Technology student with a passion for leveraging technology to solve real-world challenges. Through my academic journey and hands-on projects, I have developed a strong understanding of the role of technology in driving business insights. My experiences in data analysis, project management, problem-solving, web development volunteer work among others have shaped me into a proactive, collaborative, and results-oriented individual eager to contribute, grow, and always ready to learn in a professional setting. I am excited to begin my career and explore opportunities that align with my interests in technology and innovation. Feel free to check out my projects in my portfolio to see my recent work, where I've applied my skills in data analysis, web - development, and problem-solving. I look forward to connecting and sharing more about the projects I've built and the skills I bring to the table
